Why Aurigene Pharmaceutical Services?

State-of-the-art infrastructure to support process safety assessment

Detailed SOPs for calorimetry, thermal screening and powder safety

Experience in evaluating large number of APIs and intermediates

Safety assessment instruments

- Differential Scanning Calorimetry (DSC)
- Thermal Screening Unit (TSU)
- Reaction Calorimetry (RC1mx)
- Accelerating Rate Calorimetry (ARC)

Powder safety studies

- Minimum Ignition Energy (MIE)
- Bulk powder resistivity
- Fall hammer test
- Burning behavior
- Dust explosion
