

PHARMACEUTICAL SERVICES

mRNA Production

To meet required scale for various stages from discovery to development

Adaptable | Scalable | High Quality

mRNA Production

PHARMACEUTICAL SERVICES

We offer customized synthesis of mRNA for "screening" to "scale-up for pre-clinical studies". Our high quality mRNA transcripts are ideal for functional studies, therapeutics, diagnostics and vaccine production.

Why Aurigene Pharmaceutical Services?

In vitro transcription

- Several RNA transcript types
- Conventional and self-amplifying (saRNA)
- Promoter of choice (T7/SP6)

Purification

- Well-characterized and optimized purification
- RNase free environment
- Process optimization for gram quantity
- Unmodified and modified bases
- Customized capping (ARCA/VCE)
- Cap1, Cap1 and Cap2

Analytical Control

 qRT-PCR | TAPE Station | LC-MS • Bioanalyzer | SE-HPLC

Support Services:

- Length and sequence confirmation
- Qualitative and quantitative measurement of capping enzyme activity and efficiency
- Customized formulation
